MERMAIL MENU at company with user extensions starting with "3" and "5" - Here is how to provide one digit menu choices plus the ability to dial a 4-digit extensions 3XXX and/or 5XXX.

```
KEY         ACTION       _
1           CA           MAILBOX ID        1234
2           AS           ANNOUNCEMENT ID   2345
3           TS           THRU-DIALER ID    999333
4           RP           REPEAT PROMPT
5           TS           THRU-DIALER ID    999555
```

THRU DIALERS that know they will only "hear" three digits but will "send" four digits

```
ID 999333 (inserts a "3" before the digits it hears)
Name Number Both
Variable Fixed
Digits 4  Left Pad 3          Suppress Prompts Yes
```

```
ID 999555  (inserts a "5" before the digits it hears)
Name Number Both
Variable Fixed
Digits 4  Left Pad 5          Suppress Prompts Yes
```

ID numbers 999333 and 999555 are not defined just for this functionality – they are simply what I use my systems. You can use any ID numbers desired.
